

START HERE

FOXBRIDGE

Your AI, working inside After Effects.

V1.1.3

MAC · 1 USER · 2 MACS

■ Install 01

Unzip it

Anywhere. Downloads is fine.

Run the installer

In Terminal: `bash ~/Downloads/FoxBridge-v1.1.3/install.sh`

Paste your license key

It's in your Gumroad receipt email, and in your Gumroad Library at gumroad.com/library (open FoxBridge there).
Later: `foxbridge activate YOUR-KEY`

Allow scripts

After Effects › Settings › Scripting & Expressions › tick
Allow Scripts to Write Files and Access Network

Connect your AI

Claude, Codex, Cursor, VS Code and more: open
`CONNECT YOUR AI.md`. Your paths: `foxbridge mcp-config`

■ First 60 seconds 02

Open After Effects

Any project, any comp.

Ask: “Run ae_status.”

Green = connected. macOS asks once: click OK.

Ask: “What's in this comp?”

It reads layers, keys, expressions.

Ask for a frame

“Render 2 s into this comp so I can see it.”

“I'm working in Main Comp.”

It stays out and works on a copy.

■ Updates 03

Checks once a day

New version? `ae_status` says so, in one line.

Check now

`foxbridge update` · version: `foxbridge version`

Sends nothing about you

A plain download of
`foxinthecomp.com/updates.json`.

■ Help 04

hello@foxinthecomp.com

Run `ae doctor`, then email the output.

foxinthecomp.com/help/foxbridge

■ What else Fox makes 05

Fox Script Pack v1

5 dockable scripts.

The Fox Manifesto

6 gates. 20 rules. Templates.

The Fox Prompt Pack

39 prompts for clean comps.

foxinthecomp.com/shop
